Xiaoqian | Worst Trade

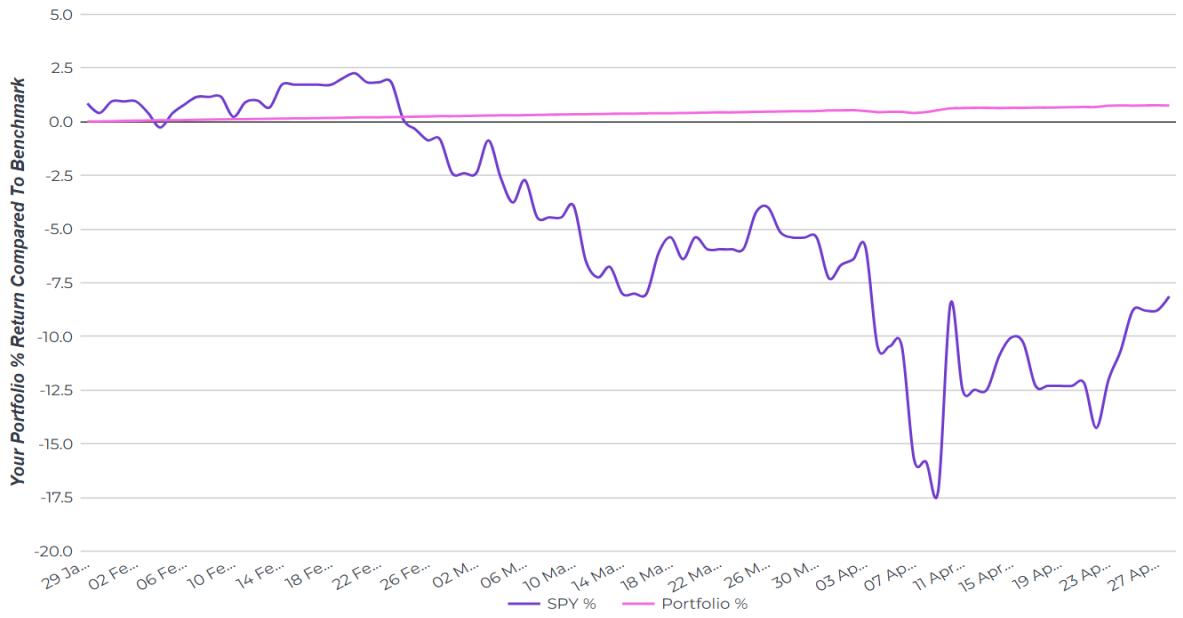

Worst Trade:

I didn’t keep the high return by shorting the 2-year T-Notes Futures when I saw my return fall from the peak. So it decreased a lot in the end.

Litao Tan | Personal Trades

Strategies

- **Gold (Long):** Safe haven asset amid geopolitical uncertainty and weak USD.
- **Crude oil (Short)**: Weak demand + high inventory .
- **Copper (Short):** Slowing global industrial growth.
- **Silver (Short):** Dollar strength expectation + industrial slowdown.

SPY	2,200.00	$548.18	554.32	3.47	13,502.00	1.12%	$1,219,504.00	

SPY – *SPDR S&P 500 ETF Trust*

Strategies

- Long position + Covered Call (Strike 570, exp. 5/30/25)

Why It Worked:

- Captured upside in a rising S&P 500 index.
- The 570 strike was set slightly above market to allow limited upside while earning premium.
- Enhanced return through option premium from covered call.
- Strong timing in a bullish market.

MSFT – *Microsoft Corporation*

Strategies

- Long position + Protective Put (Strike 370, exp. 5/30/25)

Why It Worked:

- Captured upside in a strong-performing tech stock (MSFT).
- The put option acted as a hedge, limiting potential downside.
- Strategy allowed me to stay invested despite market uncertainty.

V – *Visa Inc.*

Strategies

- Long position + Bull Call Spread (Buy 335 / Sell 345, exp. 5/30/25)

Why It Worked:

- The stock appreciated as expected, benefiting both the long equity and the option spread.
- The bull call spread reduced initial premium outlay while targeting a specific upside range.
- Dual exposure created a favorable risk/reward ratio with capped loss and limited gain.

UNH	1,100.00	$417.95	409.23	-10.77	-9,592.00	-2.09%	$450,153.00	

UNH – *UnitedHealth Group Incorporated*

Strategies

- Long position only (no protective hedge)

Why It Worked:

- Entered during a weakening period in the healthcare sector.
- No protective put or stop-loss strategy to cap downside exposure.
- Price dropped significantly, leading to the largest realized loss in the portfolio.
